

## **Portable maximum security unit with modern 256 Bit AES hardware encryption**

- the takeMS MEM-Drive Crypto USB 256 Bit AES

**The 256 Bit encryption guarantees best possible access protection for confidential data; reliable and user-friendly – purpose-built to meet the latest security requirements of business, banking, insurance, hospitals and authorities. Labeled with the “Trusted Device” seal of quality.**

Breisach, October 7<sup>th</sup>, 2009 – The memory-specialist takeMS now provides customers with a new USB flash drive for highest security requirements. With the MEM-Drive Crypto USB 256 Bit AES, data will be reliably backed and protected against unauthorized access via password-protection. After the compulsory password entry, removable media will be unlocked and data decoded. After 6 failed password entries, data will be unrecoverably erased from the flash drive. So, data-thieves will have a hard time. Awarded with the “Trusted Device” quality seal, the MEM-Drive Crypto stands for best possible data security. The USB flash drive is available with transfer-rates up to 11 MB/s and with up to 32 GB memory.

### **Main functions:**

- » Maximum security for confidential data through compulsory 256 Bit AES encryption\*
- » Data-theft-protection through compulsory password entry\*
- » Secure password protection with automatic data deletion after 6 failed password entries\*
- » “Trusted Device Level 3” quality seal (CoSoSys, Endpoint Protector)

### **Technical specifications:**

- » Windows 2000 (SP4), Windows XP (SP3), Windows Vista, Windows 7
