

PRESSEMELDUNG

The first 100% JEDEC conform DDR3 Triple-Channel-Memory kit

– made by takeMS

The first JEDEC conform DDR3 Triple-Channel-Memory modules for Core i7 with 1.5 Volt memory voltage by takeMS are available by now for the “Entry-Level” version with 1066 MHz or the “Extreme-Edition” with 1333 MHz each in an either 3 or 6 GB kit.

Breisach, November 4th, 2008 – From now on the takeMS International AG provides DDR3 Triple-Channel kits to back up the upcoming Core i7 platform. The 3 or 6 GB kits will be the first Triple-Channel kits running with 1.5 V memory voltage, 100% JEDEC conform. Due to an absolutely low power drain they reduce power intake of the entire system and thus also relieve the strain on the memory controller. The memory capacity is increased by 50% with Triple-Channel compared to Dual-Channel. Because of the Core i7 CPUs' high power loss and an Intel-defined TDP limit, overclocking has been limited. As soon as overclocking of the CPU reaches this limit value, the CPU clocks down by itself. The memory's power intake belongs therefore through the CPU's integrated memory controller also to the TDP. Thanks to the low 1.5 V power intake of the takeMS memory modules users can overclock their computers way better than with other DDR3 modules requiring a 1.65 V – 2.2 V supply.

The efficient takeMS DDR3 Triple-Channel kits optionally for the “Entry-Level” version with 1066 MHz (Timings 7-7-7-20 @ 1.5 Volt) or the “Extreme-Edition” with 1333 MHz (Timings 8-8-8-24 @ 1.5 Volt) in 3 or 6 GB kit are available by now.

takeMS international AG is one of the leading manufacturers of memory products world-wide. In more than 50 countries the name takeMS stands for highest quality standards and a convincing price performance ratio. takeMS has settled the demanding German quality guidelines as its standard. With its millionfold sold products takeMS has received the highest honour a company can receive: the confidence of its long standing customers. Additionally numerous national and international awards for takeMS products confirm the high requirement of this young company. The conviction in its products allows takeMS to grant a 10 years warranty on memory modules, 5 years on its innovative flash and USB products and 2 years on hard drives, digital frames and navigation systems.
